

ELENA REVICHEVA

Applied AI Engineer | AI Automation | Agentic Systems | AI Product Builder

aipa@aideazz.xyz | +507 616 66 716 (WhatsApp)  [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Juan Diaz, Panama City, Panama | Remote Worldwide | UTC-5

PROFESSIONAL SUMMARY

Applied AI Engineer and AI Systems Builder designing and operating production AI workflows, LLM applications, and automation systems. Experience across agentic pipelines (LangGraph), memory architectures (RAG + pgvector), evaluation frameworks, and cloud deployment.

Background combines 7+ years of executive leadership in digital transformation with hands-on delivery of AI products across agents, CRM automation, conversational AI, and operational intelligence.

Work in an AI-augmented engineering workflow (Cursor + Claude Code), using modern tooling to accelerate implementation while owning architecture, debugging, deployment, and production outcomes. Strongest in shipping real AI systems and turning business problems into deployed solutions.

Seeking Applied AI Engineer, AI Product Engineer, AI Automation, Internal AI Tools, or AI Solutions Engineering roles.

CORE TECHNICAL SKILLS

AI-Augmented Development

Cursor IDE · Claude Code · AI-assisted implementation, refactoring, and rapid iteration from prototype to production

AI & Agents

Claude · OpenAI · LangGraph · LangChain · RAG · evaluation frameworks · tool calling · multi-step orchestration

AI-Augmented Engineering

Python · TypeScript · FastAPI · REST APIs · PostgreSQL · Docker

Cloud & Operations

Oracle Cloud (OCI) · AWS Lambda · Railway · Supabase · monitoring · automation

AI Discoverability (GEO / AEO / Technical SEO)

Built AI-ready discoverability systems using structured data (JSON-LD), AI crawler governance, llms.txt, static rendering, and automated sitemap/canonical/hreflang management to improve visibility across search and AI platforms.

Data Automation & Market Intelligence

Built automated research and enrichment pipelines using Bright Data, SERP extraction, browser automation, and AI agents for lead intelligence, competitor analysis, and CRM enrichment.

CRM & Revenue Operations (HubSpot)

Built AI-assisted CRM workflows for qualification, enrichment, attribution, routing, deduplication, and sales process automation.

Integrations

GitHub API · Telegram Bot API · WhatsApp Business API · PayPal · X/Twitter API · Make · Buffer · Resend · Playwright

Web3

Polygon · Thirdweb · IPFS · NFT infrastructure · smart contract integrations

PROFESSIONAL EXPERIENCE

Applied AI Engineer | Aldeazz.xyz (Founder-led AI Lab) | Panama / Remote | 2025 – Present

Designed, built, and currently operate an AI-first ecosystem of 12+ production AI systems, autonomous agents, and automation pipelines using AI-augmented engineering workflows (Cursor + Claude Code). Delivered end-to-end execution from concept and architecture to deployment and ongoing operations across real-world business and personal use cases, with production infrastructure primarily hosted on Oracle Cloud through the startup program and early user traction.

VibeJobHunter AIPA — AI-Assisted Job Discovery & Qualification Pipeline (Production)

- Processed and evaluated **1,900+ opportunities**, supporting the creation of **250+ tailored applications** and **140+ personalized outreach messages** through AI-assisted research and qualification workflows while keeping final application decisions human-controlled.
- Designed, built, and operate an agentic pipeline with LangGraph to collect, filter, score, and route opportunities into actionable next steps, reducing manual research and evaluation effort
- Implemented evaluation and quality controls combining deterministic scoring, golden-set validation, and LLM-as-judge methodology to improve recommendation consistency
- Automated opportunity research, ATS analysis, and personalized outreach drafting while maintaining human review before submission

Tech: Python, LangGraph, LangChain, Claude (Haiku + Sonnet), Playwright, SQLite, Resend, Telegram Bot API

EspaLuz — Conversational AI Learning Platform (Production)

- Built and operate a subscription-based bilingual (EN/ES) AI tutor delivering personalized language learning across WhatsApp and Telegram with persistent memory, multimodal interaction, and AI-assisted content generation.
- Designed a 2-layer memory architecture combining conversation history and semantic retrieval (RAG + pgvector) to maintain learning continuity and personalize responses across sessions
- Implemented multimodal learning capabilities including text, OCR, voice interaction, and AI-generated speech for a more natural tutoring experience
- Deployed and maintained multi-platform user experiences with isolated session management and shared knowledge infrastructure across channels
- Launched subscription-based monetization with early users across 19 Spanish-speaking markets and PayPal payment processing integration

Tech: Python, GPT-4, LangChain, pgvector (PostgreSQL), OpenAI embeddings, Whisper, RAG, WhatsApp Business API, Railway

CTO AIPA — AI Engineering Operations & Decision Support System (Production)

- Built and operate an internal AI system for code review, technical decision support, and daily operational visibility across 12 active GitHub repositories — running 24/7 on an AI-augmented stack.
- Designed AI-assisted workflows for repository monitoring, automated PR review, and technical/security analysis, with cost-aware model routing (Groq Llama 3.3 70B for speed, Claude for critical and security review) to balance capability against cost
- Built a voice-to-action pipeline: voice notes → transcription → intent detection → structured tasks, knowledge, and contextual memory persisted to Oracle (mTLS) for asynchronous planning and execution
- Developed an automated Sprint Briefing agent (AWS Lambda + EventBridge, fires 8 AM daily): aggregates overnight activity across all 12 repos plus the day's voice notes and tasks → Groq clusters the signals → Claude writes the narrative → OpenAI TTS renders an MP3 → delivered to Telegram. A true two-way voice-memory loop — notes spoken at night surface as an audio briefing in the morning — for ~\$2/month in cloud cost

Tech: TypeScript, Node.js, Claude, Groq, OpenAI TTS, Oracle Cloud (mTLS), AWS Lambda, AWS EventBridge, AWS S3, GitHub API, PM2

AI Marketing & RevOps Agent (CMO AIPA) — Production

Autonomous bilingual (EN/ES) growth + revenue agent: GEO/AEO content, lead capture, lead qualification, and follow-up — integrated with HubSpot.

- Lead pipeline: multi-source ingest → LLM buying-intent gate → HubSpot deal w/ enrichment + dedup → stage routing → Trello action board (cleaned a 400+ deal CRM into a real daily action view)
- Bright Data enriches every lead (founder/firmographic signals); an autonomous research agent drafts a tailored pitch angle
- GEO/AEO: FAQPage + JSON-LD (AEO 4→9/10), llms.txt, per-article static HTML — discoverable by Google AI Overview / Perplexity
- Resilient daily blog (Dev.to + aideazz.xyz) with Anthropic→Groq fallback so publishing never stops on credit limits

Tech: Python, FastAPI, Claude, Groq, HubSpot API, Bright Data, Make.com, Buffer

Additional Deployed Products

Voice Growth Engine & "Building in Public" Podcast — One voice note → bilingual blogs + social atoms + a published podcast episode, all UTM-attributed into HubSpot. Auto-publishing RSS feed + branded site (podcast.aideazz.xyz), live on Spotify, YouTube, Listen Notes, and Podcast Index. Episodes from

real voice or AI-narrated; full GEO/AEO (PodcastSeries/Episode schema, sameAs entity graph) for AI-search discoverability. *Tech: Speechmatics, Claude, OpenAI TTS, 4everland/IPFS, RSS, HubSpot, Buffer*

ALGOM Alpha — AI web3 education and market analysis bot on X (@reviceva). *Tech: Node.js, ElizaOS, CCXT, Twitter API*

Creative AI (atuona.xyz) — Multimodal AI creative pipeline: LLM → image → video → blockchain NFT Drops publishing. *Tech: TypeScript, Node.js, Claude Opus, Replicate, Luma Labs API, Thirdweb.com, Polygon*

Key Portfolio Metrics

Metric	Result
Production AI systems	12+ operating autonomously
Active GitHub repositories	12
AEO / GEO readiness	FAQPage + JSON-LD; AEO 4/10 → 9/10; ~92% overall
Lead engine	Multi-agent → HubSpot; LLM buying-intent gate; Bright Data enrichment
LangGraph pipeline	7-node StateGraph, SQLite checkpointer, human interrupt
Semantic RAG	pgvector + OpenAI embeddings, 2-layer memory, confirmed live
Eval harness	131 tests, 4 layers, LLM-as-judge, ~\$0.03/run
AWS Lambda	Sprint Briefing Agent, EventBridge cron, ~\$2/month
Oracle Cloud uptime	24/7 runtime, zero crash-restarts
Multi-model routing	76% cost-optimized models · 24% high-capability for complex tasks

System resilience	Anthropic→Groq fallback so production never stops on credit exhaustion, self-healing architecture, automated recovery, no manual intervention
-------------------	---

Operational Co-Founder

OmniBazaar (Decentralized Marketplace Start up) | Remote | 2024 – 2025

- Structured DAO LLC (Marshall Islands); designed governance, tokenomics, and DAO operating agreements aligned with smart contracts

Deputy CEO and Chief Legal Officer

JSC "E-GOV OPERATOR" | Russia | 2011 – 2018

- Led large-scale public-sector digital transformation at board level
- Managed cross-functional teams (IT, legal, compliance, enterprise technology programs)
- Board-level governance in Russian regional E-Government sector

Deputy CEO (Business Development)

Fundery LLC (Fintech/Blockchain) | Russia | 2017 – 2018

- ICO compliance, investor relations, regulatory documentation, blockchain launch strategy

EDUCATION AND CERTIFICATIONS

- **Anthropic Academy** — Claude Certification Program | 2026 | In Progress
- **Polkadot Blockchain Academy** (PBA-X Wave #3) | 2025 | Online
- **How-To-DAO Cohort Graduate** | 2025 | Online
- **MA Social Psychology** | Penza State University | 2018 | Russia
- **Blockchain Regulation** | MGIMO | 2017 | Moscow
- **Presidential Program for Executive Management** | RANEPA | 2015 | Moscow
- **Internship** | Nyskapingsparken Innovation Park | Bergen, Norway

LANGUAGES

Russian (Native) | English (Fluent) | Spanish (Intermediate) | French (Elementary)

TARGET ROLES

Applied AI Engineer · AI Product Engineer · AI Automation Engineer · Internal AI Tools Engineer · Agent Systems Engineer (Application Layer) · AI Solutions Engineer · AI Automation Lead

Comfortable working across business and technical teams as an embedded builder or internal lead, designing and delivering AI-driven solutions from concept to production.

Open to: Full-time · Contract · Fully Remote (remote-first teams)
