WHAT I DO FOR A BUSINESS

- **Get you found by AI.** People now ask ChatGPT, Claude, Gemini and Perplexity instead of searching. I check whether those assistants can read and recommend your website, and I fix what blocks them. **Free instant score:** [aideazz.xyz/api](#)
- **Answer customers 24/7, in Spanish and English.** AI assistants on WhatsApp and Telegram that remember each customer and hand over to a human when it matters.
- **Stop losing enquiries.** Every enquiry becomes a written reply ready to send and a record in your CRM — you approve with one tap, nothing is forgotten.
- **Take the repetitive work off your team.** Reports, follow-ups, publishing and data entry run automatically, with a person still approving what matters.
- **I build it and I run it.** From the business problem to a working system that stays up — no long project, no big team, results you can see in days.

PROFESSIONAL SUMMARY

AI product and solutions lead. I design, build and run AI systems that are used every day — and I own the result from the business problem to live operation.

In eighteen months I built and now operate **12+ AI systems in production**, on my own: customer-facing assistants, automated marketing and sales operations, and a **public AI Visibility Audit API** that scores any website for AI search.

Before AI, **7+ years as a company executive** — Deputy CEO and Chief Legal Officer of a national e-government operator, leading large digital transformation programs in a strictly regulated environment. So I can sit with the owner, agree what matters, and then build it myself.

Strongest at turning an unclear problem into a working system — and at finding the failure nobody noticed.

SELECTED WORK

AI Product & Solutions Lead | [Aldeazz.xyz](#) (founder-led AI Lab)

Panama / Remote | 2025–Present

Designed, built and operate an AI-first ecosystem of **12+ production AI systems**, autonomous agents and automation pipelines, hosted on the Oracle Cloud Startup Program. Operating method: [aideazz.xyz/sop-ai-ops.html](#)

AI VISIBILITY AUDIT API — my own product, free to try: [aideazz.xyz/api](#)

Tells any business, in seconds, whether ChatGPT, Claude, Perplexity and Google AI can read and recommend its website — and exactly what to fix first.

- Public web service that scores any site 0–100 with a grade and a prioritized fix list: **34 automatic checks** in four areas — access for AI assistants (25%), machine-readable business facts (25%), answer-readiness (30%), technical health (20%).
- Reports separately whether **ChatGPT, Claude, Perplexity, Gemini** and two more AI crawlers are allowed to read the site at all — the blocker most owners never see.
- Runs on my own infrastructure with API keys and a public demo key; used as the opening offer for AI-visibility consulting work.

AI SEARCH VISIBILITY ENGINE (GEO / AEO / TECHNICAL SEO)

Being recommended by AI assistants is the new referral. I run the full system that makes a site quotable — and I measure whether it actually gets cited.

- Machine-readable identity for [aideazz.xyz](#): structured data (company, person, FAQ), **llms.txt**, a published fact sheet with a preferred citation format, sitemap and an explicit policy for AI crawlers.
- **146 published pages** from a daily English/Spanish publishing pipeline with two safety gates I built after real failures: it **refuses to publish any number that cannot be traced to a verified source**, and it blocks near-duplicate articles.
- A **weekly automated check** of whether AI answer engines really cite the site — visibility proven by measurement, not claimed.
- **AI Ops Wiki** ([aideazz.xyz/ai-ops-wiki.html](#)): **21 real production incidents and 18 named failure patterns**, written up automatically from verified records and cross-posted to the blog and Dev.to.

CMO AIPA — AI marketing and revenue operations

Marketing that runs itself: campaigns, content and reporting, with the numbers traced back to where the money came from.

- **Atlas Shifted AIPA**, an AI marketing strategist for competitive intelligence, creative ideation and campaign optimization (live: [webhook.aideazz.xyz/whitespace/atlas.html](#)).
- Automated revenue operations in HubSpot: AI lead qualification, campaign attribution and **GA4 reporting**.
- Multi-channel publishing across **LinkedIn, Instagram** and web, synchronizing product launches with content distribution.

VIBEJOBHUNTER — AI that finds, scores and screens opportunities

The same pattern that filters CVs, sales leads or suppliers: an AI reviews each item against written criteria, a human makes the final call.

- Reviewed **2,500+ opportunities** through an automatic find → score → screen pipeline with human approval at every decision point; supported 600+ tailored applications and 250+ personalized outreach messages, every send human-approved.
- Built the **AI screening layer** on five AI providers so one outage cannot stop it, plus a weekly loop that re-learns from real decisions recorded in the CRM.
- Found it was silently rejecting good matches because the criteria had drifted across seven places; fixed it with **one shared rulebook and 413 automatic tests**, and proved with a re-run of 51 rejected items that 20 were wrongly rejected — before anything went live.

CTO AIPA — sales and operations automation on HubSpot CRM

No enquiry lost, no manual data entry, and the owner still approves every message that leaves the company.

- Central **HubSpot** CRM fed by several AI agents: 900+ deals and 500+ contacts with automatic source, campaign and stage tracking.
- **Lead Concierge**: an enquiry arrives, AI writes a personalized reply with the right attachments, one tap sends it, and the CRM records everything.
- Daily automated briefings across 12 active projects; workflows built with Make.com, Claude and Oracle Cloud.

ESPALUZ — customer-facing AI assistant with paying users

A 24/7 bilingual assistant on WhatsApp and Telegram that remembers each customer.

- Subscription product for families relocating to Latin America (English/Spanish), with long-term memory built on **PostgreSQL + pgvector**. Early users in **19 countries**.

ATUONA — AI video studio (atuona.xyz/aifilmstudio)

Marketing video produced end to end by AI, at a fraction of agency cost.

- Script → images → video with automatic fallback between four AI video providers → assembly → published gallery, with single scenes regenerated without rebuilding the film.

TECHNICAL STACK (for technical reviewers)

AI Engineering: Claude · OpenAI · Gemini · Groq · LangGraph · LangChain · RAG · LLM-as-judge & evaluation harnesses · tool calling · multi-provider failover

AI-Augmented Development: Cursor · Claude Code · Python · TypeScript · FastAPI · REST APIs

AI Visibility (GEO/AEO): AI Visibility Audit API · JSON-LD structured data · lms.txt · AI-crawler policy · answer-readiness · technical SEO · AI citation tracking

Automation & Integrations: HubSpot · Make.com · n8n · GitHub API · Telegram · WhatsApp · Playwright · Buffer · Resend

Cloud & Operations: Oracle Cloud (OCI) · AWS Lambda · PostgreSQL + pgvector · Docker · systemd · PM2

PREVIOUS EXPERIENCE

- **Operational Co-Founder** — OmniBazaar, decentralised e-commerce (2024–2025)
- **Deputy CEO & Chief Legal Officer** — e-government operator (Russia, 2011–2018). Led large-scale digital transformation programs in a regulated environment.
- **Deputy CEO (Business Development)** — Fundery LLC (2017–2018)

EDUCATION AND CERTIFICATIONS

- Anthropic Academy — Claude Certification Program | 2026 | In Progress
- Polkadot Blockchain Academy (PBA-X Wave #3) | 2025 | Online
- How-To-DAO Cohort Graduate | 2025 | Online
- MA Social Psychology | Penza State University | 2018 | Russia
- Blockchain Regulation | MGIMO | 2017 | Moscow
- Presidential Program for Executive Management | RANEPA | 2015 | Moscow
- Internship | Nyskapingsparken Innovation Park | Bergen, Norway

Russian (Native) | English (Advanced) | Spanish (Intermediate) | French (Elementary)

TARGET ROLES

AI Product Manager · AI Solutions Architect · AI Systems Consultant · Chief AI Officer (fractional) · AI Automation & Operations Lead · GEO/AEO & Technical SEO Lead · Applied AI Engineer

I work equally well with business teams and technical teams: I agree the outcome with the owner, design the system, deliver it into production, and explain it in plain language to the people who pay for it.

Open to: **Full-time · Fractional · Project work · On-site in Panama City · Remote worldwide**
