Costa del Este, Panama City | Remote Worldwide | UTC-5

PROFESSIONAL SUMMARY

Applied AI Engineer with hands-on experience building and operating production LLM systems — agentic pipelines with LangGraph, 2-layer semantic memory with RAG/pgvector, automated evaluation harnesses, and cloud deployment on Oracle and AWS Lambda.

Background combines 7+ years of executive leadership in large-scale digital infrastructure programs (Deputy CEO & CLO, Russian E-Government sector) with 12+ months of solo AI product execution: 12 production systems, 12 active repositories, early users across 19 countries. Can translate technical architecture into business decisions — and back — in the same conversation.

I use AI-assisted development to accelerate execution, while maintaining full ownership of system design, debugging, and production behavior. Comfortable working within existing teams, tools, and processes — not only building from scratch.

Seeking roles as **Applied AI Engineer, AI Product Engineer, Founding AI Engineer, or Fractional AI Consultant/Builder.**

HOW I BUILD

I build production AI systems using an AI-augmented development workflow — Cursor IDE and Claude Code as daily primary tools. This is not a shortcut; it is a deliberate, modern methodology that produced 12+ production systems currently running in the wild. Every architecture decision, system design, and production outcome is mine — the AI compresses execution time, the judgment is entirely human.

If your hiring process includes a proctored coding assessment or a live whiteboard test, I prefer to be transparent: that is not my workflow. My strength is in building and operating real systems. I'm happy to walk through live production architectures and decisions in detail.

CORE TECHNICAL SKILLS

LLM Systems and Agents

Claude (Opus, Sonnet, Haiku) · OpenAI GPT-4 · Groq (Llama 3.3 70B, Whisper) · model routing · tool/function calling · multi-step orchestration · prompt engineering · structured outputs · multi-turn context design

Agent Frameworks & Memory

LangGraph (StateGraph, SQLite checkpointing, human-in-the-loop interrupt) · LangChain (PostgresChatMessageHistory, retrieval chains) · Semantic RAG (pgvector + OpenAI text-embedding-3-small, cosine similarity > 0.75, ivfflat index, top_k=3)

Evaluation and Quality Assurance

4-layer eval harness: keyword scoring (L1) · bias compensation (L2) · golden-set routing (L3) · **Claude Haiku as independent LLM judge** (L4, ≥75% agreement threshold, 22 golden-set jobs) · ~\$0.03/run · regression-catching before every deploy · Worked with early users to iterate on products behavior and prioritize features based on real usage

AI-Augmented Development

Cursor IDE · Claude Code · AI-assisted code generation, refactoring, and system iteration · rapid prototyping → production

Programming

Python · TypeScript · JavaScript · SQL

Backend and APIs

Node.js · Express · FastAPI · Flask · REST APIs · async workflows · webhook handling · PostgreSQL

Frontend

React 18 + TypeScript + Vite · Tailwind CSS · Framer Motion

Databases and Infrastructure

PostgreSQL (pgvector, ivfflat, cosine similarity) · Oracle Autonomous Database (mTLS) · Oracle Cloud Infrastructure (OCI) · **AWS Lambda** (Node.js, serverless) · **AWS EventBridge** (scheduled cron) · AWS S3 · Railway · Supabase · Docker · PM2 · Ubuntu

Infrastructure & Operations

Cloud deployment, process management, system monitoring, and self-healing architectures for reliable 24/7 operation

Integrations

GitHub API (Octokit) · Telegram Bot API · WhatsApp Business API · PayPal Subscriptions · Twitter/X API · Make.com · Buffer · Resend · Playwright (ATS automation)

GEO plus SEO Automation

AI-driven content systems, structured data, discoverability for search engines and AI crawlers, automated publishing and lead pipelines

Web3

Polygon · Thirdweb · IPFS · NFT Platforms · Smart Contract Interaction

PROFESSIONAL EXPERIENCE

Applied AI Engineer & Founder

Aldeazz.xyz | Panama / Remote | 2025 – Present

Founder and sole builder of an AI-first ecosystem of 12+ production LLM systems and autonomous agents — developed using AI-augmented workflows (Cursor + Claude Code).

Designed, built, and currently operate AI systems and automation pipelines across real-world business and personal use cases, from idea to production and ongoing optimization. Production systems with real users (early traction), payments, and continuous operation.

VibeJobHunter AIPA — Autonomous Job Search Pipeline (Production)

Full-stack AI pipeline that scrapes, scores, filters, and applies to jobs autonomously — with human-in-the-loop approval for edge cases. Generated 250+ tailored applications and 140+ outreach messages across 1,900+ listings in production.

- LangGraph StateGraph (7 nodes): scrape → gate → score → route → apply / outreach / discard. SQLite checkpoint (thread_id per job for full deduplication); human-approval interrupt for score band 60–69 via Telegram (/approve_vjh_{id} / /reject_vjh_{id})
- 4-layer evaluation harness (131 tests, ~\$0.03/run): Layers 1–3 deterministic (keyword scoring, bias compensation, 22-job golden set); Layer 4 = Claude Haiku as independent LLM judge at ≥75% agreement — catches scoring regressions before deploy
- Multi-ATS Playwright automation (Greenhouse, Lever, Ashby) + founder email outreach via Resend API
- Hard gate: role category, company stage, and size filters prevent auto-applying to credential-filtered roles; daily cap 5 applications + 2 outreach emails

Tech: Python, LangGraph, LangChain, Claude (Haiku + Sonnet), Playwright, SQLite, Resend, Telegram Bot API

EspaLuz — AI Spanish/English Tutor (Production, Early traction)

Subscription-based bilingual EN/ES AI tutor with 2-layer persistent memory, semantic RAG, OCR, TTS, and multimodal learning — deployed on WhatsApp Business API and Telegram. Early paying users via PayPal; traction across 19 Spanish-speaking countries.

- 2-layer memory architecture: LangChain PostgresChatMessageHistory (exact last 5 conversation turns) + pgvector semantic RAG (espaluz_embeddings table, OpenAI text-embedding-3-small, cosine similarity > 0.75, top_k=3) — injected into Claude system prompt before every reply. This means the bot remembers what you said last week and surfaces relevant past context without repeating yourself.

- Separate session namespaces per platform (telegram_* / whatsapp_*); shared espaluz_rag.py module across both deployments
- Early traction across 19 Spanish-speaking countries; PayPal subscriptions live

Tech: Python, GPT-4, LangChain, pgvector (PostgreSQL), OpenAI embeddings, Whisper, WhatsApp Business API, Railway

CTO AIPA — AI Technical Co-Founder (Production)

Autonomous AI system for code review, technical decision-making, and daily briefing across 12 active GitHub repositories.

- Automated PR review and security scanning via GitHub API; intelligent model routing (Groq Llama 3.3 70B for speed, Claude for critical/security analysis)
- Voice input pipeline: voice notes → Whisper transcription → intent detection → Oracle knowledge_base table (diary/task storage, mTLS)
- Sprint Briefing Agent (AWS Lambda, Apr 2026): EventBridge cron fires at 8AM Panama daily → Lambda reads 12 GitHub repos overnight activity + retrieves owner's voice notes and tasks from Oracle via a secure REST proxy on the CTO server → Groq clusters the signals → Claude writes a narrative → OpenAI TTS (onyx voice) renders MP3 → delivered to Telegram. Full two-way memory loop: voice notes spoken at night → briefing audio plays in the morning. ~\$2/month AWS cost.

Tech: TypeScript, Node.js, Claude, Groq, OpenAI TTS, Oracle Cloud (mTLS), AWS Lambda, AWS EventBridge, AWS S3, GitHub API, PM2

AI Marketing Agent (CMO AIPA) — Production

Autonomous bilingual (EN/ES) content agent: GEO+SEO content automation, discoverability, lead capture, and outreach pipeline — integrated with CTO AIPA for automated release announcements. Operates with minimal manual input.

Tech: Python, FastAPI, Claude, Make.com, Buffer, Railway

Additional Deployed Products

ALGOM Alpha — AI crypto education and market analysis bot on X (@reviceva). *Tech: Node.js, ElizaOS, CCXT, Twitter API*

Creative AI (atuona.xyz) — Multimodal AI creative pipeline: LLM → image → video → blockchain NFT Drops publishing. *Tech: TypeScript, Node.js, Claude Opus, Replicate, Luma Labs API, Thirdweb.com, Polygon*

Key Portfolio Metrics

Metric	Result
Production AI systems	12+ operating autonomously
Active GitHub repositories	12
Early users across Spanish-speaking countries	19
Cost vs traditional development	~99% reduction (\$900K → <\$15K) vs. traditional team-based builds
LangGraph pipeline	7-node StateGraph, SQLite checkpointer, human interrupt
Semantic RAG	pgvector + OpenAI embeddings, 2-layer memory, confirmed live
Eval harness	131 tests, 4 layers, LLM-as-judge, ~\$0.03/run
Job pipeline throughput	1,900+ listings processed · 250+ tailored applications · 140+ outreach messages
AWS Lambda	Sprint Briefing Agent, EventBridge cron, ~\$2/month
Oracle Cloud uptime	24/7 runtime, zero crash-restarts
Multi-model routing	76% cost-optimized models · 24% high-capability for complex tasks

System resilience	Self-healing architecture, automated recovery, no manual intervention
-------------------	---

Operational Co-Founder

OmniBazaar (Decentralized Marketplace Start up) | Remote | 2024 – 2025

- Structured DAO LLC (Marshall Islands); designed governance, tokenomics, and DAO operating agreements aligned with smart contracts

Deputy CEO and Chief Legal Officer

JSC "E-GOV OPERATOR" | Russia | 2011 – 2018

- Led large-scale public-sector digital transformation at board level
- Managed cross-functional teams (IT, legal, compliance, enterprise technology programs)
- Board-level governance in Russian regional E-Government sector

Deputy CEO (Business Development)

Fundery LLC (Fintech/Blockchain) | Russia | 2017 – 2018

- ICO compliance, investor relations, regulatory documentation, blockchain launch strategy

EDUCATION AND CERTIFICATIONS

- **Anthropic Academy** — Claude Certification Program | 2026 | In Progress
- **Polkadot Blockchain Academy** (PBA-X Wave #3) | 2025 | Online
- **How-To-DAO Cohort Graduate** | 2025 | Online
- **MA Social Psychology** | Penza State University | 2018 | Russia
- **Blockchain Regulation** | MGIMO | 2017 | Moscow
- **Presidential Program for Executive Management** | RANEPA | 2015 | Moscow
- **Internship** | Nyskapingsparken Innovation Park | Bergen, Norway

LANGUAGES

Russian (Native) | English (Fluent) | Spanish (Intermediate) | French (Elementary)

TARGET ROLES

Applied AI Engineer · AI Product Engineer · Founding AI Engineer · Agentic AI Engineer · Internal AI Tools Engineer · Fractional AI Consultant/Builder (\$40–70/hr) · Agent Systems Engineer (Application Layer) · AI Solutions Engineer · AI Systems Operator · AI Automation Lead · AI Integration Specialist · Internal AI Tools Lead · AI Operations / AI Program Manager

Comfortable working across teams as an internal lead or embedded specialist, designing and delivering AI-driven solutions from concept to production.

Open to: Full-time · Part-time · Contract · Remote
